removed.txt

A solution is to allow a metering at the pole on LCM claim. This requires that we have an agreement with Joy Global for the conduit through their property.

Thanks Jeremy, that solution would likely work very well for us.

Matt,

Deliberative Process/Ex. 5

We could set an overhead transformer(s) at the takeoff pole and you could meter at the pole location. I will talk with our metering department about this option. If we took this route, SMPA would not require an easement for any primary facilities. All of the wire would be yours and our facilities could stop at the meter.

Thanks,

Jeremy Fox
